2. During the encounter Source was told the following by Subject:

a/ The Soviet economy is in a state of deep disintegration. This is

being primarily caused by the sabotages of Stalinists who impede Khrushchev's initiatives and efforts to improve the situation. The Russian chauvinists - Stalinists are against Khrushchev and regard him as a "khailhol" who surrounded himself ^{with} other "khailhol" with whose help he rules.

The supply of consumer goods is insufficient and inefficient. There is a shortage of consumer goods and their distribution is very badly organized. In consequence, very often, only very little reaches the consumer and frequently there is a big difference between private-market-and store-prices, in favor of the former. (thus as an example he mentioned that a pair of shoes that could be bought at private market at R 5.-, might cost in a store even R 25.-).

b/ Nationalization is very intensive and in cities usually Ukrainian is spoken. There is also a great influx of Russians, who as a rule occupy higher and middle administrative posts. Recently, however, remarkably increased the
